Configuration Options

Choose what how you would like to configure Nagios XI. To get started right away, try using a configuration wizard under the 'Start Monitoring Now' section.

Deploy Monitoring Agents and Configure

Quickly deploy NCPA (our monitoring agent) on a Linux system and configure what you'd like to monitor.

[Run Auto Deployment >](#)

Start Monitoring Now

Quickly monitor a new device, server, application, or service using an easy configuration wizard.

[Run a configuration wizard >](#)

Auto-Discovery

Run an auto-discovery job to automatically find hardware, devices, and services to monitor.

[Use the auto-discovery tool >](#)

Website Configuration Wizard

Step 3

Monitoring Settings

Define basic parameters that determine how the host and service(s) should be monitored.

Under normal circumstances:

Monitor the host and service(s) every minutes

When a potential problem is first detected:

Re-check the host and service(s) every minutes up to times before sending a notification

< Back Next > Finish with Defaults Cancel
